Cobra planetary update

Dec 2025

- ▷ A huge cosmic angelic being from the M87 galaxy, named Aaea, has embraced the whole Solar System with energies of cosmic Love. This angelic being extends from the heliopause outwards in all directions until the edge of the Oort cloud about 1 light year away, and is roughly spherical in shape.
- ▷ It looks like a beautiful puffy cloud of violet pink color with extremely high vibrational frequency and constantly emanates very high frequency Love energies into the Solar System.
